SEVERE PUNISHMENT IS METED OUT BY THE JUNIORS.

THERE are four High school seniors. who will not soon again attempt to learn the secrets of junior class of the Columbia college mining engineers, numbering about twenty-live and under escort of Professor Peele, will arrive the middle of next week from New York to spend the summer months at the doors of the practice hall. They got enough, and a whole lot too much, got enough, and a whole lot too much, too, by making such an attempt at the too, by making such an attempt at the Grand theatre yesterday. They were caught, and the result was a rush and a wild scuffle, in which some blood was spilled, scniors were tied to poles and painted all over. The police were called out, but were howled away by the juniors.

The juniors took delight in painting rainbows of many colors on the cheeks and foreheads of the helpless victims. When the job had been completed the seniors looked like dressed up Indians. In order to put an appropriate finish on the whole affair, the seniors were escorted to the telephone poles in the middle of the street and tied there, and commanded to look pleasant while the camera fiend got their "physiogs."

County Board Matters.

Suspense account

Dr. King Condemns a Lot of VETOED BY MAYOR,—In order to be consistent throughout, Mayor Thompson yesterday vetoed the action of the council in appointing the board of public works the representative of the city in the installation of the proposed pumping plant on Utah lake. Stale Limberger.

PEOPLE FOR BLOCKS HOWLED

ANOTHER SCARLET FEVER CASE IN SCIENTIST FAMILY.

A LAS for Limberger cheese! The health department has declared war against the dairy product, and proposes to see that none of it that is strong and lively enough to walk remains in the city very long. The food inspector has instructions to see that no stale cheese is placed on the market, and a consignment of the product that made an odoriferous appearance in the western part of the city yesterday was immediately condemned. Yesterday morning a car came in over the Short Line from Denver, carrying no less than ninety-five cases of cheese. Some of the employes about the depot, after seeing the cheese, imagined they had smelled it coming. Anyhow, it wasn't necessary to announce the arrival of the car, for everybody within a radius of several blocks of the depot knew it was there very shortly after its arrival.

Odor Was Strong.

The odor from the cheese was so strong that the employes of the depot could hardly remain on duty, and the health authorities were called upon to come to the rescue of the suffering employes. Dr. King and Food Inspector Bridge examined the car at as close range as the strength of the cheese would permit, and they condemned the whole lot as a nuisance to the community and a menace to health. The cheese, it is declared, was decayed and in such a condition that it couldn't be ased, the health authorities say, with-out causing sickness. The cheese was, accordingly, condemned, and was hauled away to the dumping grounds,

The health authorities say that no spoiled cheese can be sold in the city if they can prevent it, and the food in-spector has been given instructions to keep a strict watch for it, as well as all other kinds of food that might be in bad condition.

Kept Scarlet Fever Secret.

In tracing up contagious disease cases yesterday, the health authorities found a case of scarlet fever in a Christian Science family that, they say, has been kept secret for a week or more. The child, it is said, has been in a very dangerous condition, and there were several other children in the house who have been going to school all the time, without anyone knowing that any disease existed in the house. The authori-Mrs. E. W. Clarke has returned from an eastern trip and in a few days will occupy with Mr. Clarke their new home at 1070 Third street.

Judge J. D. Hammond of Jackson, Mich., accompanied by his wife, was in the city yesterday, en route to the coast. Judge Hammond is a cousin of Secretary of State Hammond. ties refused to divulge the names of the parties.

There have been a number of cases of scarlet fever in the school where the Scientist children have been in attendance, it is said, and the health authoriies attribute much of it to this case. The authorities, it is said, propose to investigate these cases very closely, and bring the law to bear in every in stance possible.
